

# Gun care at its finest. By LIQUI MOLY.

Firearms need to be safe, reliable, and well-maintained. LIQUI MOLY, a German lubricant specialist, introduces the GUN TEC line, leveraging its decades of expertise in vehicle maintenance, cleaning, and care to provide the optimal solution for firearms.

Car and gun owners both face similar challenges, the need to ensure that their vehicles and firearms retain their functionality and value through regular maintenance. This applies to hunters and sport shooters, whether they use short or long guns for hunting, competition, at the shooting range, or for professional purposes.

Function and appearance are important factors for everyone, from casual users to gun collectors. They all understand the value of proper maintenance. Careful cleaning, lubrication, and attention to detail will ensure that your gun is safe and reliable when needed. GUNTEC products from LIQUI MOLY will help guarantee this.

### GUNTEC Gun Oil

100 ml / 3.3 FL OZ  
Part No. 24402

### GUNTEC Gun Grease

50 ml / 1.6 FL OZ  
Part No. 24404

#### Description

A very adhesive, mid-viscosity PTFE free specialty oil for lubrication and preservation of guns, gun parts and metal components. Maximized corrosion protection and exceptional wear protection of all moving parts, thanks to superior lubrication properties. Provides superb penetrating properties and is highly resistant to thickening which makes it ideal and usable when lubricating various precision mechanisms. Universal use on polymers and metals as well as protecting wood rifle stocks.

#### Areas of application

- Used for gun lubrication, protection and preservation.
- Excellent for lubrication, wear and corrosion protection for re-loading machinery, tools, metal components, instruments and more. Exceptional protection against corrosion, rust and erosion from long term storage.

#### Properties

- Salt-spray tested (FTM 4001.2) to provide long-term corrosion protection and resistance to rust and oxidation.
- PTFE Free with excellent long-term lubricating effect.
- Outstanding oil film strength- ensures hydrophobic (strongly water-repellent) does not gel or become sticky.
- Outstanding dissolving properties for powder and smoke residues yet does not attack burnished parts or contain acids.
- Compatible with polymer/composite plastics- strong adhesion and yet easy to remove.

#### Description

A very adhesive PTFE free specialty grease with specialty ceramic lubricants for ultimate performance and safe operation. Ceramic lubricants minimize friction and reduced wear for maximum reliability even in critical situations or in extreme temperatures. Safeguards corrosion protection on all metal surfaces.

#### Areas of application

- Used when lubricating handguns, rifles and shotguns and for use on various firearm parts and components.
- Highly recommended for metal-plastic, plastic-plastic and metal-metal friction pairings such as metal slides on polymer hand guns and rifle bolt actions.
- Excellent on other precision components like fine threads and slides.
- Recommended for use in a wide range from low to high temperatures.

#### Properties

- Ceramic technology produces extreme friction reduction combined with maximum wear and corrosion protection.
- Compatible with polymer composite plastics, does not contain solvents or acids.
- Waterproof, high-strength adhesion with long-term stability.
- Wide operating temperature range [-32 - +365 °F] with the temperature range of the solid lubricant to 2012 °F.
- Color / appearance white, water insoluble.
